These cages are custom built and durable with high quality PVCX. They are lightweight, CNC machined and one-piece Thermo formed construction and can be stacked 8 cages high. Cages are waterproof, and fire retardant. Included with all cages is a full set of metal hardware and locks for durability and safety.

As the manufacturer, we can also offer you OEM Manufacturing of cages built to your specifications. Custom designs are our specialty and our prices are guaranteed to be extremely competitive. Please contact us for further details.
This cage is the same size as the standard cage with the added benefit of having a built in divider to accommodate 2 separate reptiles instead of one. Both sides are independently lockable. Can be stacked 8 cages high and will create a nice mix and match option with the standard cages.

This is the arboreal design cage appropriate for reptiles that require the extra height. This cage provides ample space for climbing and viewing.
